

# THE PORTABLE BATCHING SOLUTION

Turning Quality Into Concrete

Cart-Away Concrete Systems, Inc.

The loading, mixing and dispensing of the concrete materials is all completed inside the C.U.B.E.'s rugged steel box. This portable concrete batch mixer reduces the equipment needed on the job-site and can work in even the harshest conditions.

The mixing process is simplified with a unique conveyor loading system. A tractor, bulk-bags or a silo can load the top-mounted 36" by 120" conveyor. Which moves the materials through a diverter into the mixing drum. Water is metered as it comes in from a simple garden hose connection. The 1.5 cu. yd drum mixes by spinning in one direction then reverses and tilts to dump the wet concrete into a loader bucket, concrete buggy or wheel barrow for distribution.

The C.U.B.E. is a compact, simple package that can be used anywhere that you want to save on mixing costs.

# CONCRETE CUBE

## A Batching System for your most difficult projects

The strong frame and large mixing capacity of the C.U.B.E. provides you with many options.

- **Stationary batching at job-site.**
- **Load and move it on a trailer/truck.**
- **Hook it with a roll-off system.**
- **Mount it on a platform.**
- **Rail-Track it into a mine.**
- **Float it on a barge.**
- **Crane it to upper floors.**
- **Mount it on a swivel.**
- **Helicopter it into remote sites.**
- **Load it with super sacks.**
- **Attach load-cells.**
- **Use your imagination.**

Some of the most interesting construction projects are supported with the portable batching/mixing C.U.B.E. From cell towers on mountain tops to resort construction in the Islands, the C.U.B.E. mixers have produced thousands of yards of quality concrete.

- **1 ½ Yd. Capacity Drum**
- **13 Hp Honda Gas Engine**
- **Empty Weight: 3500 lbs**
- **Auburn H-D Gearbox**
- **Ross Hydraulic Motor**
- **Uni-Body Hydraulic Valves**
- **Gearsaver Speed and Direction Control**
- **4 Corner Lifting Points & Dual Fork Pockets**
- **2"x8" Structural Steel Skids, Full Length**
- **Frame Mounted Steel 2" Towing Insert.**
- **Dimensions: 48" W x 78" H x 132" L**
- **Optional Electric or Diesel power.**
- **Optional Hydraulic Powered Bag Loader**
